

# Environmental Remediation Services

**Environmental Remediation Services (ERS):** ERS ensure safety and compliance with regulations, and are essential for addressing and mitigating the impact of contaminants in the environment.

## Services:

- **Oil Spill Cleanup and Disposal:** Removal and disposal of oil spills to minimize environmental impact. This includes proper containment, removal, and disposal in compliance with environmental regulations. oil spills from industrial sites, transportation accidents, and storage facilities.
- **Contaminated Soil Removal and Disposal:** Includes excavating and removing polluted soil, assisting with the restoration of affected areas, and ensuring safe disposal at permitted facilities. It is crucial for sites affected by industrial accidents, chemical spills, and long-term contamination.
- **Chemical Spill Cleanup:** Rapid response to chemical spills including neutralizing, containing, and cleaning up hazardous and non-hazardous spills, minimizing their environmental impact. Suitable for manufacturing plants, laboratories, and transportation incidents.
- **Treatment System Maintenance and Vacuum Truck Services:** Regular maintenance of treatment systems to ensure optimal performance, servicing wastewater treatment plants, industrial facilities, and other sites requiring regular maintenance.
- **Pressure Washing:** High-pressure cleaning for a variety of surfaces to remove grime, pollutants, and residues from industrial equipment, buildings, and infrastructure.
- **Environmental Emergency Response:** Rapid response to environmental spills and accidents. Includes containment, cleanup, and remediation services.
- **Industrial Tank Cleaning:** Cleaning and maintenance of storage tanks to prevent contamination and ensure operational efficiency.
- **Hazardous Regulated Waste Disposal:** Safe and compliant disposal of hazardous waste materials.
- **Non-Hazardous Regulated Waste Disposal:** Compliant disposal of regulated Non-hazardous waste materials.

## Some of the Containments We Handle:

**Petroleum Products:** Oil, gasoline, diesel, and other petroleum-based substances.

**Hazardous Chemicals:** Industrial chemicals, solvents, acids, and bases.

**Heavy Metals:** Lead, mercury, arsenic, and other toxic metals.

**Organic Contaminants:** Pesticides, herbicides, and other organic pollutants.

## Where Our Services May Be Needed:

**Manufacturing Plants:** Cleaning and maintenance to prevent contamination and ensure safe operations.

**Chemical Processing Facilities:** Handling and disposal of hazardous materials to maintain a safe environment.

**Power Plants:** Cleaning and waste removal to ensure efficient and safe operations.

**Construction Sites:** Managing spills and waste to maintain a clean and safe work environment.

**Municipal Sewer Systems:** Cleaning and maintenance to prevent blockages and ensure efficient operation.

**Storage Tanks and Silos:** Regular cleaning to prevent contamination and ensure the integrity of stored materials
