

Landfill Pipelines and Leachate System Maintenance Services

Landfill and Leachate System Maintenance Services - High pressure line jetting to clear blockages and maintain the flow in of landfill pipelines, and leachate collection systems to reduce environmental impact, and ensure regulatory compliance.

What do we service: Landfill Pipelines, Leachate Lines, Leachate Tanks, Side Risers, Pumpstations, Gas Sumps, Catch Basin Lines, Culverts, Tanks, Sumps, Drain Lines.

Types of Materials We Remove: Sludge, Sediment, Scale, Debris, Blockages, Accumulated Liquids, Hazardous Materials, Contaminant.

Landfill Leachate Collection System Cleaning Services:

- **Leachate Line Jetting**: High-pressure water jetting to clear blockages, remove scale, and maintain flow in leachate lines.
- **Leachate Line CCTV Video Survey with report**: Advanced video technology to inspect the interior of leachate lines for blockages, damage, leaks, or wear.
- **Leachate Tank Cleaning**: Thorough cleaning of leachate tanks to remove sludge, sediment, and other Buildup.
- **Leachate Vacuum Extraction**: Combination trucks extract leachate and debris from collection systems, sumps, and tanks during jetting or cleaning services.
- **CCTV Video Survey & Report**: Utilizing various camera equipment, including a camera jetting nozzle, to perform video inspections while cleaning, with detailed reports provided.

Pipeline Services:

- **Pipeline Jetting**: High-pressure water jetting and combination vacuum truck techniques to clean pipelines, including pipes, catch basin lines, culverts, tanks, sumps, drain lines, and leachate lines (including scale removal).
- **Side Riser Pumpstation Cleanout**: Cleaning and maintenance of side riser pump stations to ensure optimal performance.
- **Gas Sump Reclamation**: Extraction and cleaning of gas sumps to manage landfill gas effectively.
- **Storm Water Drainage and Culvert Vac Out Cleaning**: Evacuation of storm water drainage systems and culverts to remove debris and prevent blockages.
- **Sump Cleanouts**: Vacuum cleaning of sumps to remove accumulated liquids and debris.
- **CCTV Pipeline Inspection and report**: Comprehensive CCTV inspections with reports, utilizing multiple state-of-the art cameras to visually examine pipe interiors for any signs of damage, leaks, or obstructions.
- **Pumping / Dewatering**: Removing puddled leachate from seeps of water and flooded areas.
- **Spill Response**: Rapid response to hazardous and non-hazardous material spills.
- **Decontamination Services**: Cleaning and decontaminating areas affected by hazardous materials.\
