

# Regulated Waste Disposal Services

**Regulated Waste Disposal Services:** Safely manage and dispose of hazardous and non-hazardous waste in compliance with environmental laws. This includes identifying, categorizing, and properly disposing of waste to protect public health and the environment.

## Non-Hazardous Waste Removal

- **Drum and tote removal and disposal:** Expert management of non-hazardous waste, ensuring safe handling and compliance with all regulations.
- **Waste Profiling, Consolidation, Transportation and Permitting:** Assistance with waste characterization, profiling, and transportation to an appropriate permitted facility.

## Hazardous Waste Removal

- **Customized Waste Solutions:** Tailored services for the removal and disposal of various types of hazardous waste materials.
- **Certified Handling:** Utilization of certified professionals to handle and transport hazardous waste safely.

## Lab Pack Services

- **Identification and Categorization:** Assessing and classifying chemicals to determine the appropriate disposal method.
- **Safe Handling and Disposal:** Management of hazardous and non-hazardous waste, ensuring regulatory compliance.
- **Waste Profiling, Consolidation, and Permitting:** Assistance with waste characterization, profiling, and obtaining necessary permits for disposal.
- **Packaging and Transportation:** Proper categorization and packaging of chemical waste, followed by safe transportation to permitted disposal facilities.
- **Laboratory Chemical Packing and Disposal:** Specialized services for packing and disposing of laboratory chemicals.

## Environmental Safety Services

- **Chemical Waste Categorization and Disposal:** Identification and categorization of chemical waste streams for proper disposal to permitted facilities.
- **Environmental Protection:** Services designed to mitigate environmental risks associated with regulated waste
- **Emergency Response:** Readiness to respond to environmental emergencies involving regulated waste including cleaning up contaminated sites to restore them to safe conditions.
- **Spill Cleanup Services:** Thorough cleanup, safety, and compliance with state and federal environmental regulations for spills including oil and chemical spills.

## Where Our Services May Be Needed:

**Educational Research Institutions and Laboratories:** Often need lab pack services to safely dispose of various chemicals, waste and materials from university science research labs, and maintenance activities.

**Manufacturing Plants:** Safely handle and dispose of hazardous and non-hazardous waste by identifying, inventorying, and categorizing it to comply with environmental regulations.

**Construction Sites:** Generate various waste materials, including hazardous substances like asbestos during renovations, and require emergency spill cleanup services.

**Automotive Industry:** Car manufacturing and maintenance facilities generate waste like used oils, solvents, and other materials that need regulated disposal.

**Power Plants:** Properly dispose of hazardous waste like fly ash and chemicals from coal-fired and other power generation facilities.

**Food Manufacturing:** Manage non-hazardous waste, including packaging materials and food by-products, to comply with environmental regulations.

**Municipalities:** Handle household hazardous waste like old batteries and chemicals to maintain community health and safety.

**Environmental Cleanup:** Remove hazardous materials from contaminated sites and address environmental spills to protect the environment and public health.

**Agricultural Operations:** Manage pesticide and fertilizer waste from large farms to prevent soil and water contamination.

**Pharmaceutical Companies:** These companies generate various types of waste, including hazardous chemicals, that need proper categorization and disposal services.

**Chemical Plants:** Handle and dispose of various waste types, including solvents and by-products, ensuring regulatory compliance.

**Retail Centers:** Generate non-hazardous waste from packaging materials and products like cardboard and plastic packaging from distribution warehouses.

**Electronics Manufacturers:** Handle hazardous waste like heavy metals and solvents from the production of electronic components that need certified handling.

**Mining Operations:** Remove and dispose of toxic sludge and other hazardous waste from mining activities.

**Oil Refineries:** Categorize and dispose of chemical waste from refining processes and provide spill cleanup services.

**Healthcare Facilities:** Dispose of medical waste like used syringes and expired medications from hospitals and clinics.
