

Hydro (Vacuum) Excavation Services

Hydro (Vacuum) excavation: This non-destructive digging method utilizes high-pressure water and vacuum technology to safely uncover underground utilities and perform precise non-destructive excavations. Vacuum trucks equipped with air, water, mechanical, or hand agitation are used to loosen debris, which is then efficiently removed by a high-velocity vacuum.

Hydro Vacuum Excavation Services:

- **Pipe Exposure:** Safely uncovering underground pipes for inspection, maintenance, or repair. Ideal for utility companies and construction sites to prevent damage during excavation.
- **Directional Drilling Debris Removal:** Clearing debris from directional drilling operations to maintain clean and efficient sites.
- **Fence Post Hole Digging:** Digs precise holes for fence posts without disturbing the surrounding area. Useful for construction and landscaping projects.
- **Daylighting:** Exposes underground utilities for inspection and maintenance. Important for utility companies and construction sites to ensure safety and accuracy.
- **Utility Line Location:** Locating and confirming the position of underground utility lines.
- **Trenching:** Digging trenches for pipelines, cables, and other underground installations.
- **Piling and Test Holes:** Digging holes for pilings and conducting soil tests.
- **Underground Storage Tank (UST) Exposure:** Safely exposing underground storage tanks for inspection and maintenance.
- **Water Pipe Identification:** Locating and identifying water pipes for repair or replacement.
- **Environmental Remediation Excavation:** Careful use of vacuum trucks to excavate contaminated soil for removal and remediation.
- **Storm Drain and Sewer Line Cleaning:** Removing debris and blockages from storm drains and sewer lines.
- **Spill Response and Cleanup:** Rapid response to industrial spills, ensuring safe and thorough cleanup.
- **Catch Basin and Manhole Cleaning:** Cleaning and maintaining catch basins and manholes to prevent blockages.
- **Tank and Vessel Cleaning:** Cleaning storage tanks, silos, and vessels to remove residues and contaminants.
- **Regulated Waste Disposal:** Compliant disposal of hazardous and non-hazardous waste.

Who May Need These Services:

Utility Companies: For safe exposure of underground utilities.

Construction Sites: For precise excavation and utility location.

Property Developers and Managers: For final project cleanings and utility maintenance.

Industrial Facilities: For safe excavation and maintenance of industrial systems.

Environmental Firms: For site remediation projects.

Oil & Gas Industry: For tank and vessel maintenance and pipeline installation.
