

Vacuum Truck Services

Vacuum Truck Services: Efficient removal of wet and dry materials using powerful vacuum trucks and vacuum systems.

Wet/Dry Vacuum Cleaning Services: Multi-functional vacuum/Jetter trucks remove both wet and dry materials, effectively clearing blockages, debris, and sediment buildup to ensure optimal working conditions.

- **Storm Drain Cleaning:** Maintains stormwater systems by removing leaves, trash, and sediment.
- **Catch Basins:** Prevent blockages and remove debris, grit, dirt, sand, mud, and leaves from basins and connecting lines.
- **Landfill Leachate Collection System Cleaning:** Maintaining the integrity of landfill leachate lines. Our services extend to landfill gas (LFG) collection systems, including the maintenance of wells, piping, flares, valves, and sumps. Proper maintenance ensures efficient gas collection and energy recovery while mitigating environmental impact.
- **Oil/Water Separator Service:** Maintenance and cleaning of separators to ensure they function efficiently.
- **Drain, Sump, Pit, and Trench Cleanout:** Removal of waste and debris from various types of pits and trenches.
- **Sand Trap/Grit Trap Service:** Cleaning of traps designed to capture sand and grit to prevent blockages.
- **Tank and Vessel Cleaning:** Cleans storage tanks, silos, and vessels to remove residues and contaminants.
- **Tank Pumping:** Services for holding tanks and underground waste tanks, including spill cleanup and tank pumping
- **Sewer and Water Drain Cleanup:** Maintenance and cleaning of sewer lines and water drains.
- **Non-Hazardous Liquids and Sludge Disposal:** Safe disposal of non-hazardous waste materials.
- **Spill Response and Cleanup:** Rapid response to industrial spills, ensuring safe and thorough cleanup.
- **Industry-Specific Servicing:** Customized services for the petroleum, chemical, and mining industries, among others
- **Other:** A surprising number of other items structures and things on special request of our clients at distances up to and greater than 400 LF.

Hydro excavation Services: Non-destructive digging method using high-pressure water to break up soil and a vacuum to remove debris. Ideal for safely exposing underground utilities, digging trenches, and performing precise excavations with minimal disruption.

- **Daylighting:** Exposing underground utilities for inspection and maintenance.
- **Utility Lines and Fiber Optic Location and Visual Confirmations:** Locating and confirming utility lines before excavation.
- **Trenching:** Creating trenches for pipelines, cables, and other underground installations.
- **Piling and Test Holes:** Digging holes for pilings and conducting soil tests.
- **Fence Post Hole Digging:** Digging holes for fence posts without disturbing the surrounding area.
- **UST Exposure:** Exposing underground storage tanks for inspection and maintenance.
- **Water Pipe Identification:** Locating and identifying water pipes for repair or replacement.

Jetting Services: High-pressure water streams remove blockages and buildup from pipes and sewer lines, ensuring optimal flow and preventing future clogs. Industrial-grade water Jetter hoses and nozzles pressure wash pipeline interiors for a thorough clean.

CCTV Pipeline Survey with Report Service: We complement these services with camera and video inspections, using state-of-the-art CCTV equipment to visually inspect the interior of pipes for damage, leaks, and obstructions. This allows for precise diagnostics and targeted interventions.

Environmental Remediation Services (ERS): Address and mitigate the impact of contaminants in the environment, ensuring safety and regulatory compliance.

- **Sludge Removal & Slurry Pit/Pond, Pumping & Hauling:** Removing and transporting sludge and slurry from pits and ponds.
- **Sewer Cleaning (Storm Drain, Culvert, Catch Basins, Manhole):** Cleaning various sewer systems to prevent blockages.
- **Solid Waste & RCRA Groundwater Reporting & Remediation:** Managing solid waste and reporting groundwater conditions.
- **Emergency Response Services (Oil Spill, Chemical Cleanup and Packing):** Rapid response to spills and chemical incidents.
- **Regulated Waste Disposal (Hazardous and Non-Hazardous):** Safe disposal of hazardous and non-hazardous waste in bulk or containers.

Industries We Serve:

Municipalities & Utility Companies: Supporting city infrastructure with regular maintenance, emergency response capabilities, and ensuring the safety and reliability of water, gas, and electrical lines with precise hydro excavation.

Construction & Environmental Firms: Assisting in site preparation, utility location to prevent project delays, and partnering for site remediation projects requiring careful excavation around sensitive areas.

Industrial & Manufacturing Facilities: Providing cleaning and maintenance for industrial sewer systems, industrial waste and sludge removal, equipment maintenance, and surface preparation.

Schools: Maintaining and cleaning sewer systems.

Oil & Gas Industry: Maintaining tanks and vessels.

Chemical Processing Facilities: Disposing of non-hazardous materials.

Power Plants: Removing sludge and slurry.

Stormwater Systems: Removing grit, sand, and mud.

Storage Tanks and Silos: Regular cleaning to remove scale buildup, prevent contamination, and ensure the integrity of stored materials.
